

MARCH 2019

MATTERNET FACTSHEET

Matternet is the world's leading technology platform for on-demand drone delivery in urban environments. It provides fast, and very predictable deliveries of medical items (blood samples, etc.) between facilities in hospital systems.

THE DRONE

- Matternet's drone, Matternet M2, can carry payloads up to 4.4 lbs at distances up to 12.5 miles
- M2 can deliver items on-demand between hospital facilities in less than 30 minutes

KEY MILESTONES

- Only company in the world to be authorized to conduct full medical logistics operations over cities (true BVLOS—over people operations)
- Operating at four hospital networks in Switzerland (2 in Zurich, 1 in Bern, 1 in Lugano); one network in the US (WakeMed)
- Conducted over 1,500 deliveries of patient blood samples to date; over 3,000 BVLOS flights over people
- On-going, revenue flights in Switzerland since October 2017
- Selected by the FAA to operate in the US in two projects (led by the NCDOT and City of San Diego) under the IPP program
- Conducted the first revenue-generating drone delivery operation in the US on March 26, 2019

CORPORATE FACTS

- Headquarters: Menlo Park, CA
- Employees: 52 (currently)
- Funding: \$25 million to date—last round led by Boeing HorizonX (other investors: Daimler, Sony, Swiss Post)
